

ELECTRIC CHAIN HOIST OVERLOAD GUARD

Fits most makes of electric chain hoists.

Operates under arduous service conditions.

Easy to install and no special tools required.

Overload Guard can be preset at our works or set on site to exact requirements.

Automatic reset by reducing the load.

No maintenance required other than occasional testing and inspection.

Minimal loss of lifting height.

Accurate and reliable.

Simple and inexpensive.

- * Protects against overloading of chain hoist and supporting structures.
- * Prevents accidents and ensures much safer working conditions.
- * Reduces maintenance costs.
- * Minimizes down time.
- * Gives the responsible person assurance that the electric chain hoist is working within the designed safe working load.
